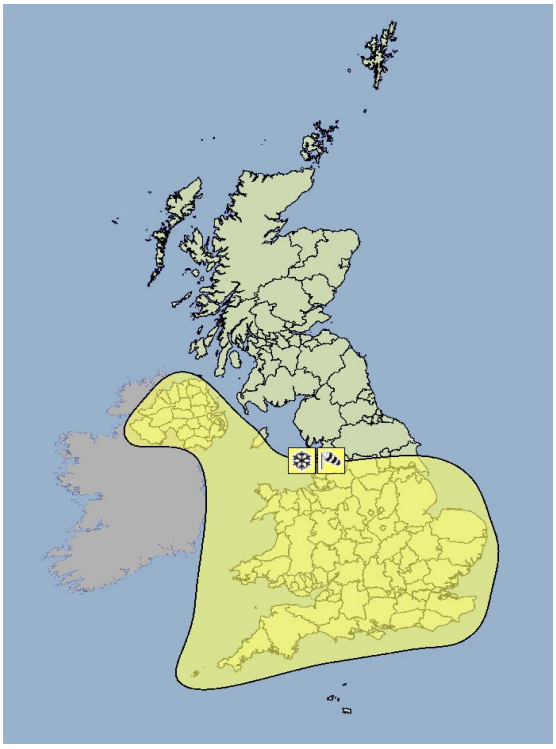
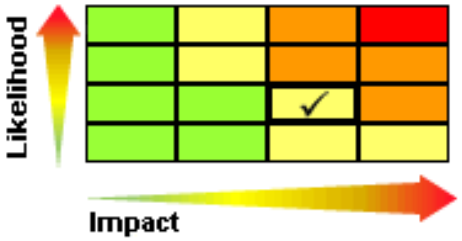
National Severe Weather Warning Service





Chief Forecasters Assessment
Further spells of snow could continue to move north through Friday and into Saturday, with the potential to produce widespread snow, accompanied by strong winds - although the winds will tend to ease a little through Friday.

This warning has been updated to bring the southern boundary south to reflect uncertainty in the timing of less cold air arriving in the south, which could be delayed, and the possibility for further spells of snow to arrive from the south later. The end time has been extended to the end of Saturday to cater for these too. The northern boundary has also been adjusted north slightly.

The Met Office have issued a **Yellow Warning** of **Wind and Snow**

Valid from **00:05 on Fri, 02nd Mar 2018** until **23:55 on Sat, 03rd Mar 2018**

There is potential for a spell of heavy snow, accompanied by strong winds at first, to affect much of Northern Ireland, Wales together with central and southern England during Friday, and perhaps further bands of snow following in behind on Saturday.

Delays and cancellations to public transport are possible, as are delays to travel on roads; some stranding of vehicles and passengers could also occur. Some rural communities could become cut off. Interruptions to power supplies and mobile phone coverage are also possible.
